## Introduction

In April 2014, the Government of the Republic of the Union of Myanmar conducted its latest census, after three decades without a Population and Housing Census. In the post-independence period, comprehensive population and housing censuses were only successfully undertaken in 1973, 1983 and most recently in April 2014.

Censuses are an important source of benchmark information on the characteristics of the population and households in every country. One unique feature of a census is its ability to provide information down to the lowest administrative level. Such information is vital for planning and evidence based decision-making at every level. Additional data uses include allocation of national resources; the review of administrative boundaries; the positioning of social infrastructures, drawing national development plans, service provision and developing social infrastructure, and for humanitarian preparedness and response.

The results of the 2014 Census have been published so far in a number of volumes. The first was the Provisional Results released in August 2014. The Census Main Results were launched in May 2015. These included The Union Report, Highlights of the Main Results, and reports of each of the 15 States and Regions. The reports on Occupation and Industry and Religion were launched in March 2016 and July 2016, respectively. All the publications are available online at <http://www.dop.gov.mm/> and <http://myanmar.unfpa.org/node/15104>.

The current set of the 2014 Census publications comprise township and sub-township reports. Their preparation involved collaborative efforts of the Department of Population and UNFPA. This report contains selected demographic and socio-economic characteristics Tedim Township in Chin State. The information included in this report is the situation of 2014 March 29, Census night. Township level information is very important. However, the level of confidence of township estimates is not the same as Union level information. Some of the townships have relatively small populations; the interpretation of these estimates should be made with caution. Some of the indicators, such as IMR/U5MR, were adopted only after careful analysis considering a number of factors to ensure consistency in the results. Estimates for townships with relatively small number of observations should not be taken as exact estimates of the mortality level, but rather they should be regarded as reasonable indicators for the scale of mortality risk they experience, an indication of which townships are better off and which are in a more vulnerable situation.

## **Census information on Tedim Township**

## (A) Demographic Characteristics

Total population	87,623 *		
Males	41,927		
Females	45,696		
Sex ratio	92 males per 100 females		
Percentage of urban population	15.4%		
Area (Km <sup>2</sup> )	2,459.7 **		
Population density (persons per Km <sup>2</sup> )	35.6 persons		
Number of wards	4		
Number of village tracts	55		
	Total	Urban	Rural
Population in conventional households	86,855	13,023	73,832
Number of conventional households	14,683	2,250	12,433
Mean household size	5.9 persons ***		
<ul style="list-style-type: none"> <li>• In Tedim Township, there are more females than males with 92 males per 100 females.</li> <li>• The majority of the people in the Township live in rural areas with only (15.4%) living in urban areas.</li> <li>• The population density of Tedim Township is 36 persons per square kilometre.</li> <li>• There are 5.9 persons living in each household in Tedim Township. This is higher than the Union average.</li> </ul>			

Note: \* Includes both household population and institution population.

**Table 2: Population by 5-year age groups, Tedim Township**

Age groups	Total	Males	Females
<b>Total</b>	<b>87,623</b>	<b>41,927</b>	<b>45,696</b>
0 - 4	12,044	6,019	6,025
5 - 9	12,142	6,110	6,032
10 - 14	11,503	5,789	5,714
15 - 19	8,915	4,254	4,661
20 - 24	6,713	3,082	3,631
25 - 29	5,540	2,499	3,041
30 - 34	5,247	2,374	2,873
35 - 39	4,589	2,136	2,453
40 - 44	4,575	2,098	2,477
45 - 49	4,176	1,969	2,207
50 - 54	3,728	1,741	1,987
55 - 59	2,767	1,303	1,464
60 - 64	2,150	970	1,180
65 - 69	1,358	615	743
70 - 74	1,037	445	592
75 - 79	569	279	290
80 - 84	369	164	205
85 - 89	147	59	88
90 +	54	21	33

- The proportion of productive working population between 15 to 64 years of age in Tedim Township is 55.3 per cent.
- The proportion of children aged 14 and below together with the proportion of the elderly aged 65 and over are less than the proportion of the working age group population.
- Fewer proportions of children and elderly reduce the dependency of those age groups on the working age population.

**Figure 3: Population pyramid (Union, Chin State, Falam District and Tedim Township)**

- The birth rate has been increasing in Tedim Township.
- The population has markedly declined from age group 10-14 onwards.
- Compared to Union level, there is a smaller percentage of working age group 15-64 population in Tedim Township.
- There are less males than females in all age groups with the exception of age groups 5-9 and 10-14.

## (B) Religion

- At the Union level, the composition of the population by religion is: 87.9% Buddhist, 6.2% Christian, 4.3% Islam, 0.5% Hindu, 0.8% Animist, 0.2% Other religion and 0.1% No religion.
- In Chin State, it is 13.0% Buddhist, 85.4% Christian, 0.1% Islam, 0.4% Animist, 1.1% Other religion and less than 0.1% each for Hindu and those with No religion.

Note: \* Less than 0.1 per cent.

## (C) Education

Table 3: Population aged 5 - 29 and current school attendance by sex by age

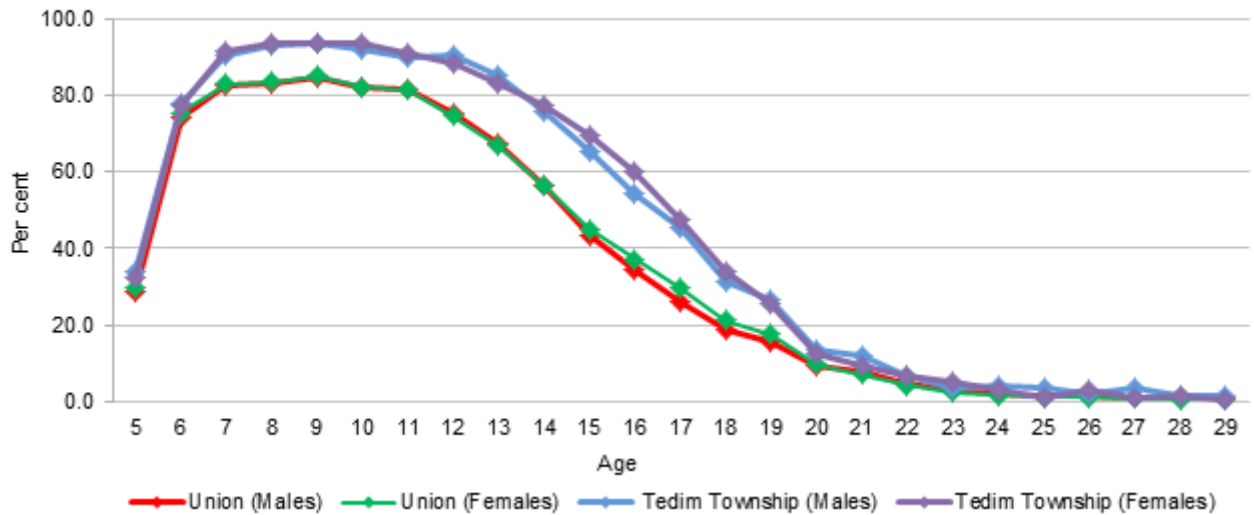

Age	Total population			Currently attending		
	Total	Males	Females	Total	Males	Females
5	2,404	1,212	1,192	799	414	385
6	2,363	1,194	1,169	1,832	928	904

25	1,236	571	665	26	20	6
26	1,104	494	610	28	10	18
27	1,041	470	571	25	18	7
28	1,114	491	623	16	7	9
29	951	410	541	10	6	4

**Figure 5: School attendance by age, Union, Chin State and Tedim Township**

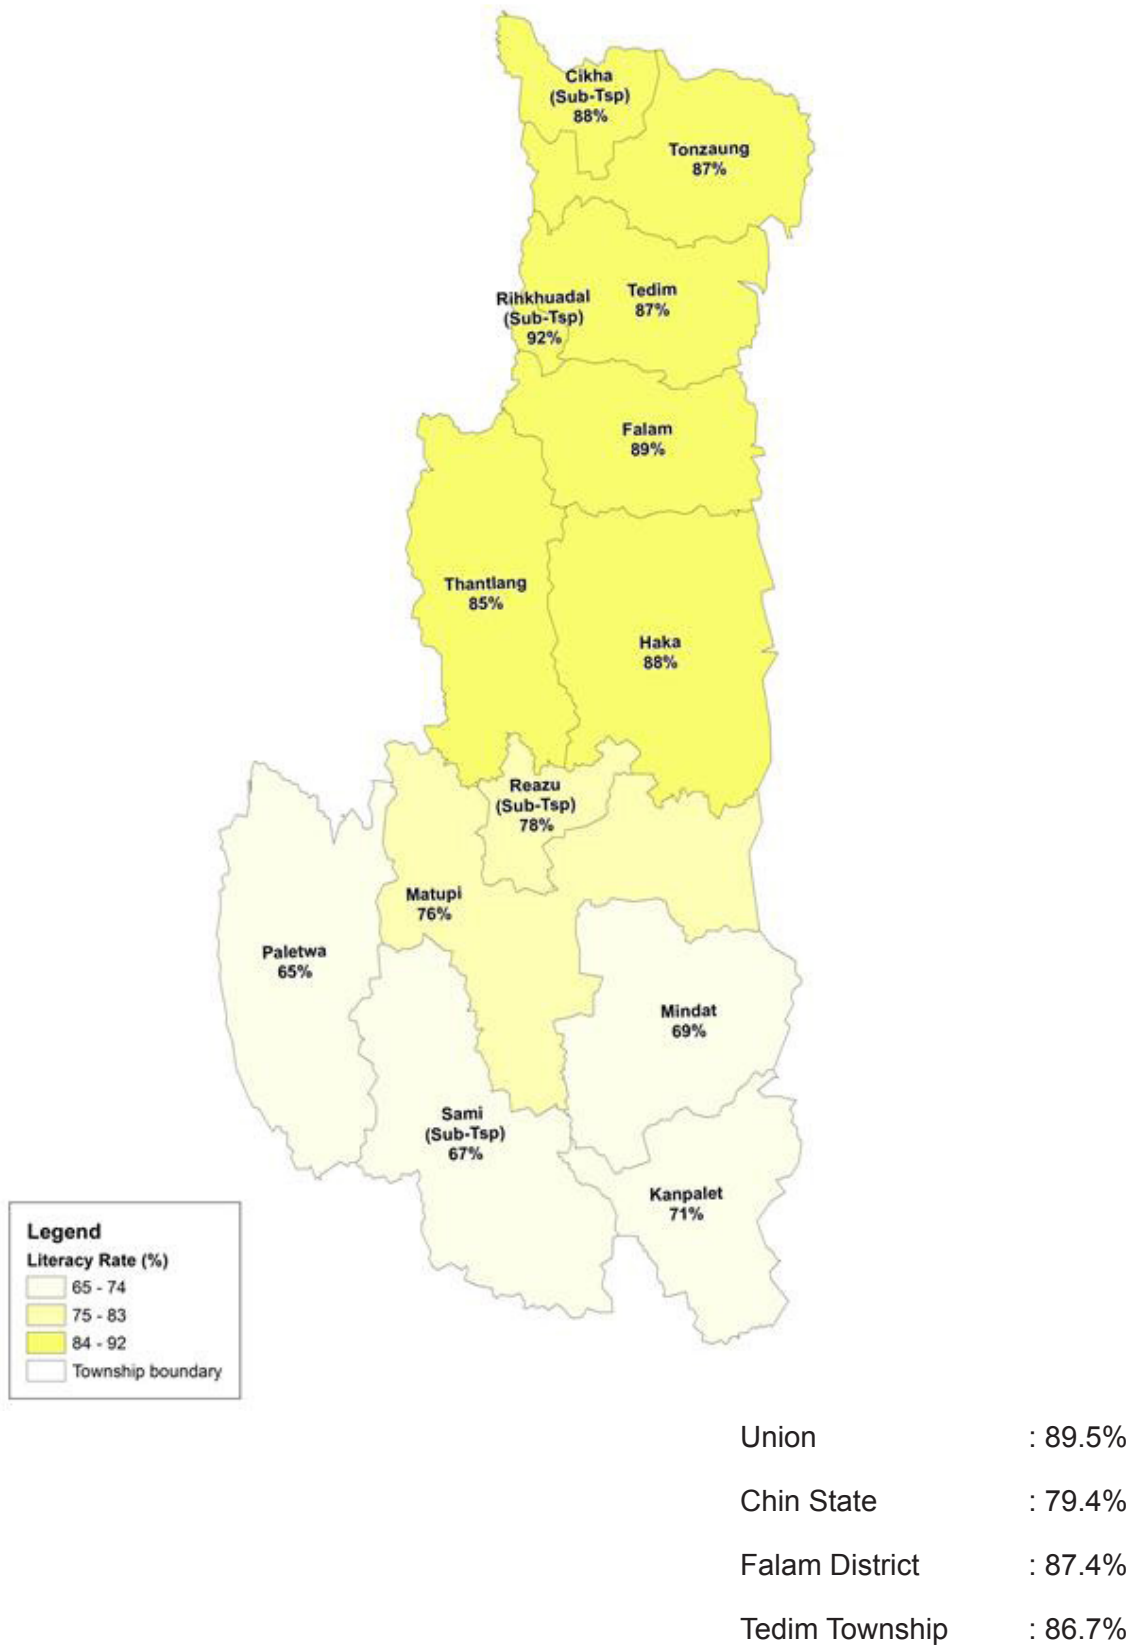

**Figure 6: School attendance by age by sex, Union and Tedim Township**

- School attendance in Tedim Township drops after age 14 for both males and females.
- Compared to the Union, the school attendance of males and females in Tedim Township is higher than that of the Union at starting from school going age.

Figure 7: Literacy rate, Chin State (aged 15 and over)

**Table 4: Youth literacy rate (15 - 24), Tedim Township**

Sex	Total Population (15 - 24)	Literacy Rate (15 - 24)
Total	15,374	96.4
Males	7,199	97.2
Females	8,175	95.7

- The literacy rate of those aged 15 and over in Tedim Township is 86.7 per cent. It is higher than the literacy rate of Chin State (79.4%) but lower than the Union (89.5%). Female literacy rate is 80.8 per cent and for the males it is 93.5 per cent.
- The literacy rate for youth aged 15-24 is 96.4 per cent with 95.7 per cent for females and 97.2 per cent for males.

**Table 5: Population aged 25 and over by highest level of education completed, urban/rural and sex**

	Total	None	% Never attended	Primary school		Middle school (grade 6 - 9)	High school (grade 10 - 11)	Diploma	University/ College	Post-graduate and above	Vocational training	Other
				(grade 1 - 4)	(grade 5)							
Total	36,306	6,345	17.5	8,042	6,656	7,435	5,394	219	1,898	222	73	22
Urban	6,463	421	6.5	815	747	1,379	1,811	80	1,080	102	20	8
Rural	29,843	5,924	19.9	7,227	5,909	6,056	3,583	139	818	120	53	14
Males	16,673	1,288	7.7	2,937	3,350	4,665	3,104	115	1,002	156	40	16
Females	19,633	5,057	25.8	5,105	3,306	2,770	2,290	104	896	66	33	6

- Some 17.5 per cent of the population aged 25 and over have never been to school.
- Of the rural population aged 25 and over, 19.9 per cent have never been to school.
- There are 7.7 per cent of males aged 25 and over who have never attended school as against 25.8 per cent for females.
- Among those aged 25 and over, 18.3 per cent has completed primary school (grade 5) and only 5.2 per cent has completed university/college education.

## (D) Economic Characteristics

Table 6: Population aged 10 and over by labour force participation rate and unemployment rate by sex and age group

Age groups	Labour Force Participation Rate			Unemployment Rate		
	Total	Males	Females	Total	Males	Females
10 - 14	5.4	5.6	5.2	11.5	15.6	7.1
15 - 19	35.6	39.5	32.1	21.4	23.8	18.7
20 - 24	69.2	77.0	62.6	23.1	26.3	19.7
25 - 29	71.1	84.0	60.6	15.5	19.1	11.4
30 - 34	71.8	88.0	58.3	10.1	12.4	7.2
35 - 39	72.8	88.7	58.9	6.5	8.6	3.7
40 - 44	69.8	88.6	53.9	4.3	5.5	2.5
45 - 49	70.0	89.0	53.0	2.7	3.6	1.5
50 - 54	65.3	86.6	46.7	1.8	2.3	1.0
55 - 59	59.3	81.2	39.9	0.9	1.1	0.5
60 - 64	41.2	59.6	26.0	1.0	1.0	1.0
65 - 69	29.8	46.2	16.3	0.7	0.7	0.8
70 - 74	18.2	26.5	12.0	-	-	-
75 +	10.4	15.1	6.5	3.4	3.8	2.5
15 - 24	50.0	55.2	45.4	22.4	25.2	19.3
15 - 64	61.9	75.3	50.3	10.8	12.2	9.0

- Labour force participation rate for the population aged 15-64 in Tedim Township is 61.9 per cent.
- The labour force participation rate of females is 50.3 per cent and is much lower than that of their male counterparts which is 75.3 per cent.
- In Tedim Township, labour force participation rate for the population aged 10-14 is 5.4 per cent.
- The unemployment rate for those aged 15-64 in Tedim Township is 10.8 per cent. There is difference between the unemployment rate for males (12.2%) and for females (9.0%).
- The unemployment rate for young females aged 15-24 is 19.3 per cent.

**Table 7: Population aged 10 and over not in the labour force by usual activity status and sex**

Sex	Usual activity status						
	Total	Did not seek work	Full time student	Household worker	Pensioner, retired, elderly	Ill, disabled	Other
Total	32,160	2.4	47.7	33.3	8.6	2.7	5.3
Males	12,103	3.8	62.2	11.9	10.8	3.2	8.2
Females	20,057	1.6	39.0	46.2	7.2	2.4	3.5

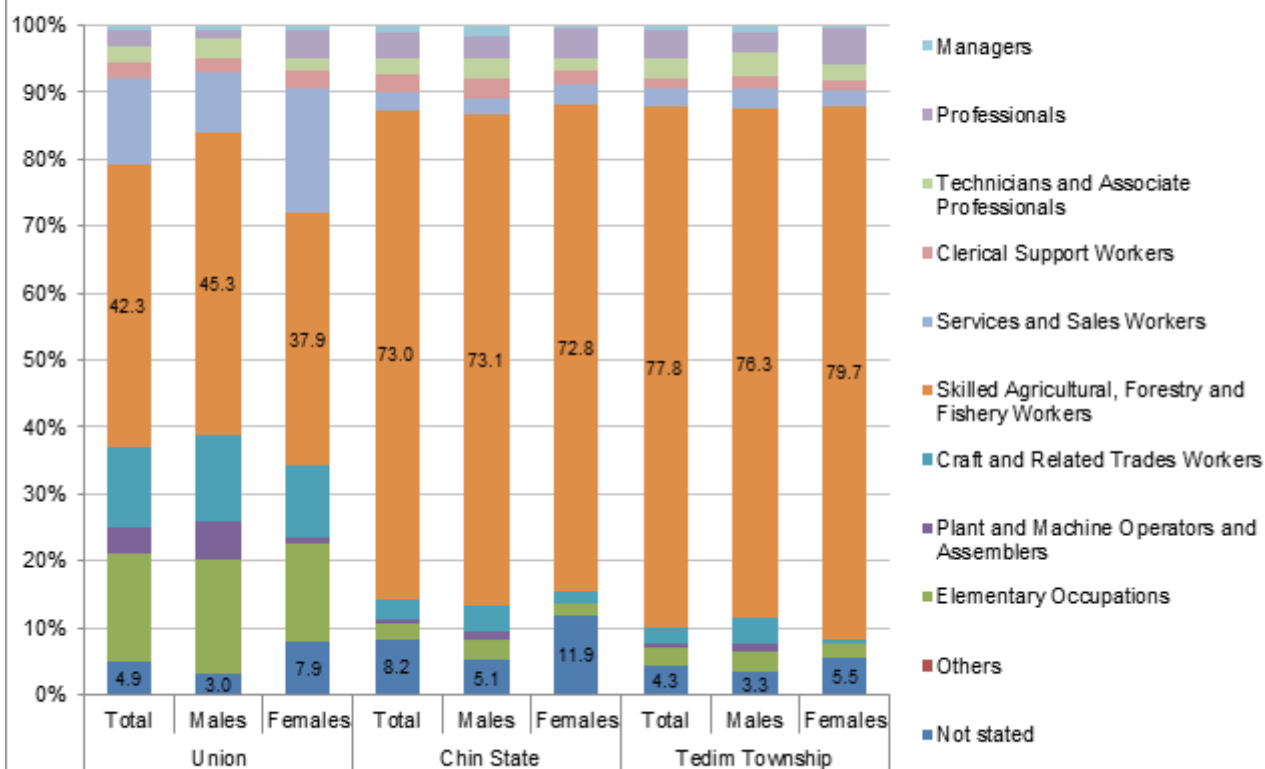

- Among those aged 10 and over who are not in the labour force, 62.2 per cent of males are full time students while 46.2 per cent of females are household workers.

**Table 8: Employed persons aged 15 - 64 by occupation by sex**

90 +	33	17	16	48.5	10	10	13	13

- Seven in every 100 persons in Tedim Township have, at least, one form of disability.
- Slightly more females than males have disability.
- The prevalence of disability increases with age and it increases considerably after the age of 60.
- Difficulties with remembering and seeing were the most commonly mentioned forms of disability in the Township.

## (G) Housing Conditions and Household Amenities

### Type of housing unit

Table 12: Conventional households by type of housing unit by urban/rural

Residence	Total	Apartment/ Condominium	Bungalow/ Brick house	Semi-pacca house	Wooden house	Bamboo house	Hut 2 - 3 years	Hut 1 year	Other
Total	14,683	0.3	1.3	1.8	89.0	6.3	0.6	0.1	0.5
Urban	2,250	2.0	6.2	6.7	83.6	1.0	0.1	-	0.4
Rural	12,433	*	0.5	0.9	90.0	7.2	0.7	0.2	0.5

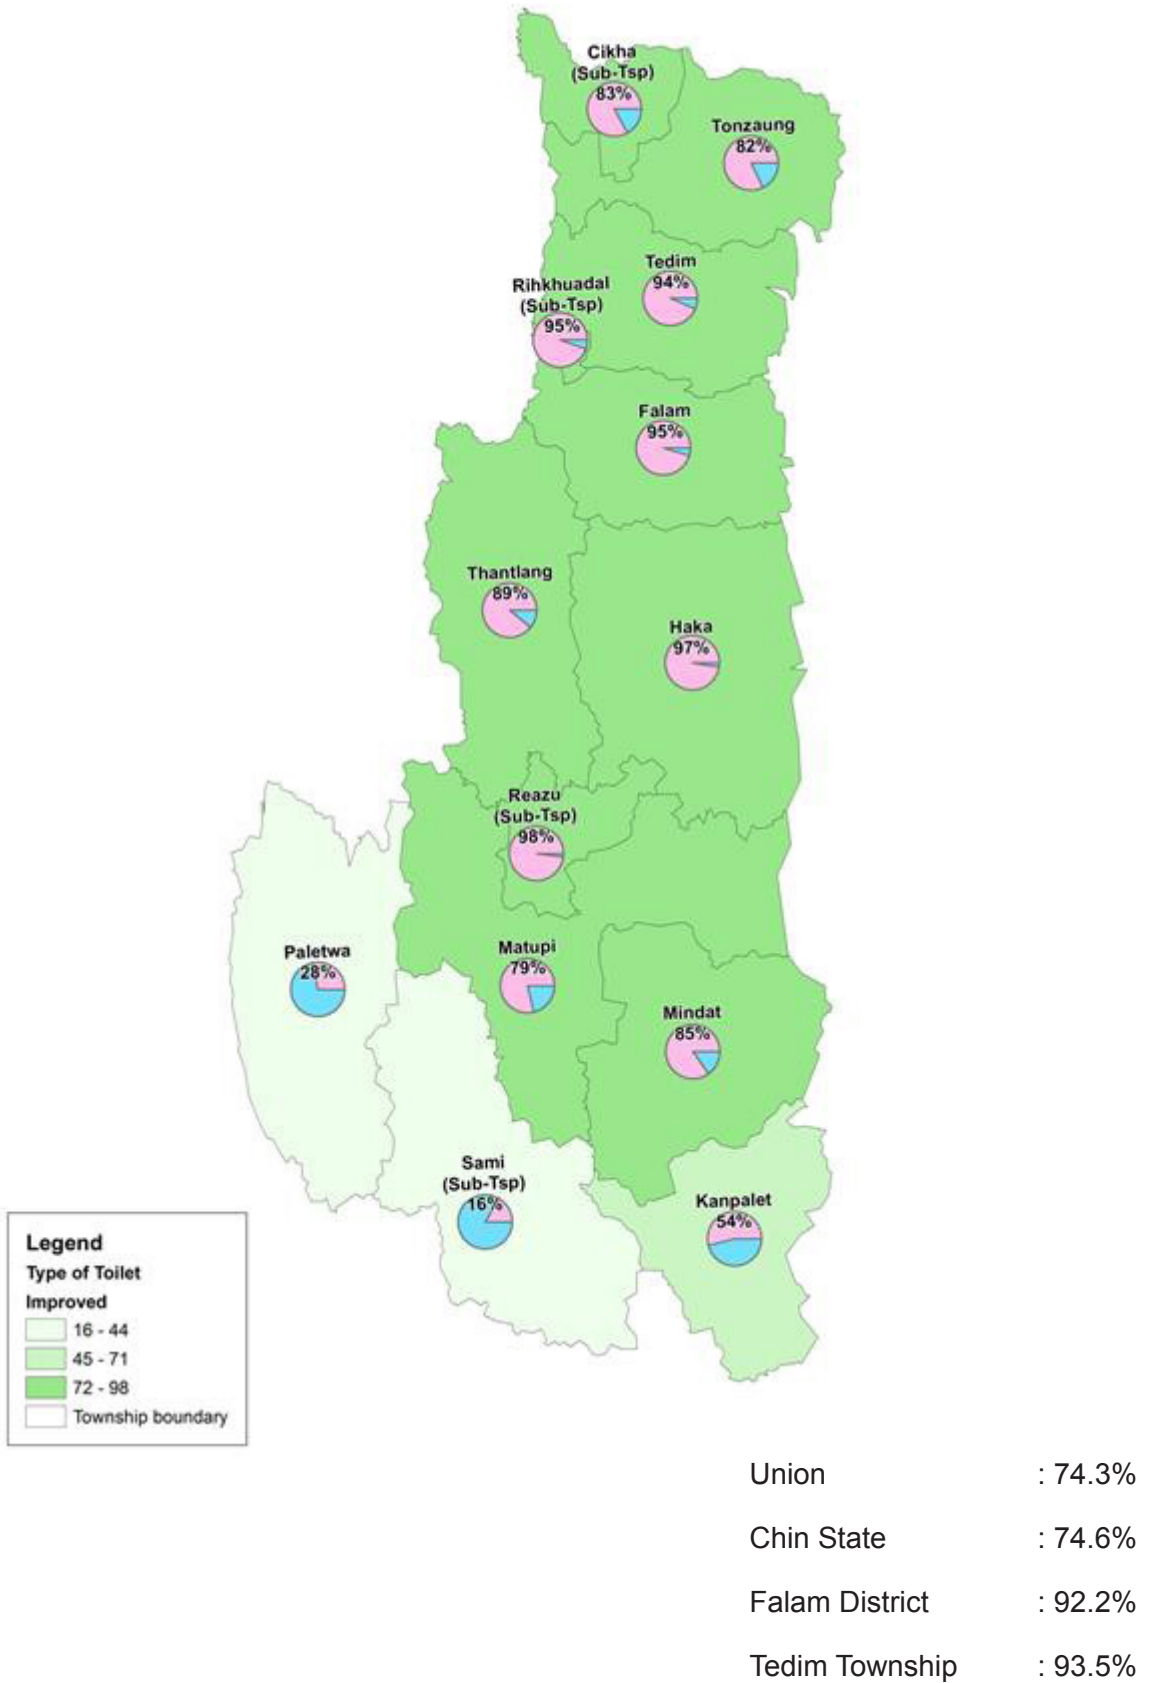

Note: \* Less than 0.1 per cent.

- The majority of the households in Tedim Township are living in wooden houses (89.0%) followed by households in bamboo houses (6.3%).
- Some 83.6 per cent of urban households and 90.0 per cent of rural households live in wooden houses.

# Type of toilet

Figure 14: Proportion of households with access to improved sanitation

**Table 13: Conventional households by type of toilet by urban/rural**

Type of toilet		Total	Urban	Rural
Flush		0.6	0.6	0.6
Water seal (Improved pit latrine)		92.9	98.4	91.9
<i>Improved sanitation</i>		<i>93.5</i>	<i>99.0</i>	<i>92.5</i>
Pit (Traditional pit latrine)		4.0	0.6	4.7
Bucket (Surface latrine)		0.3	*	0.4
Other		0.2	*	0.1
None		2.0	0.4	2.3
<b>Total</b>	<b>Per cent</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
	<b>Number</b>	<b>14,683</b>	<b>2,250</b>	<b>12,433</b>

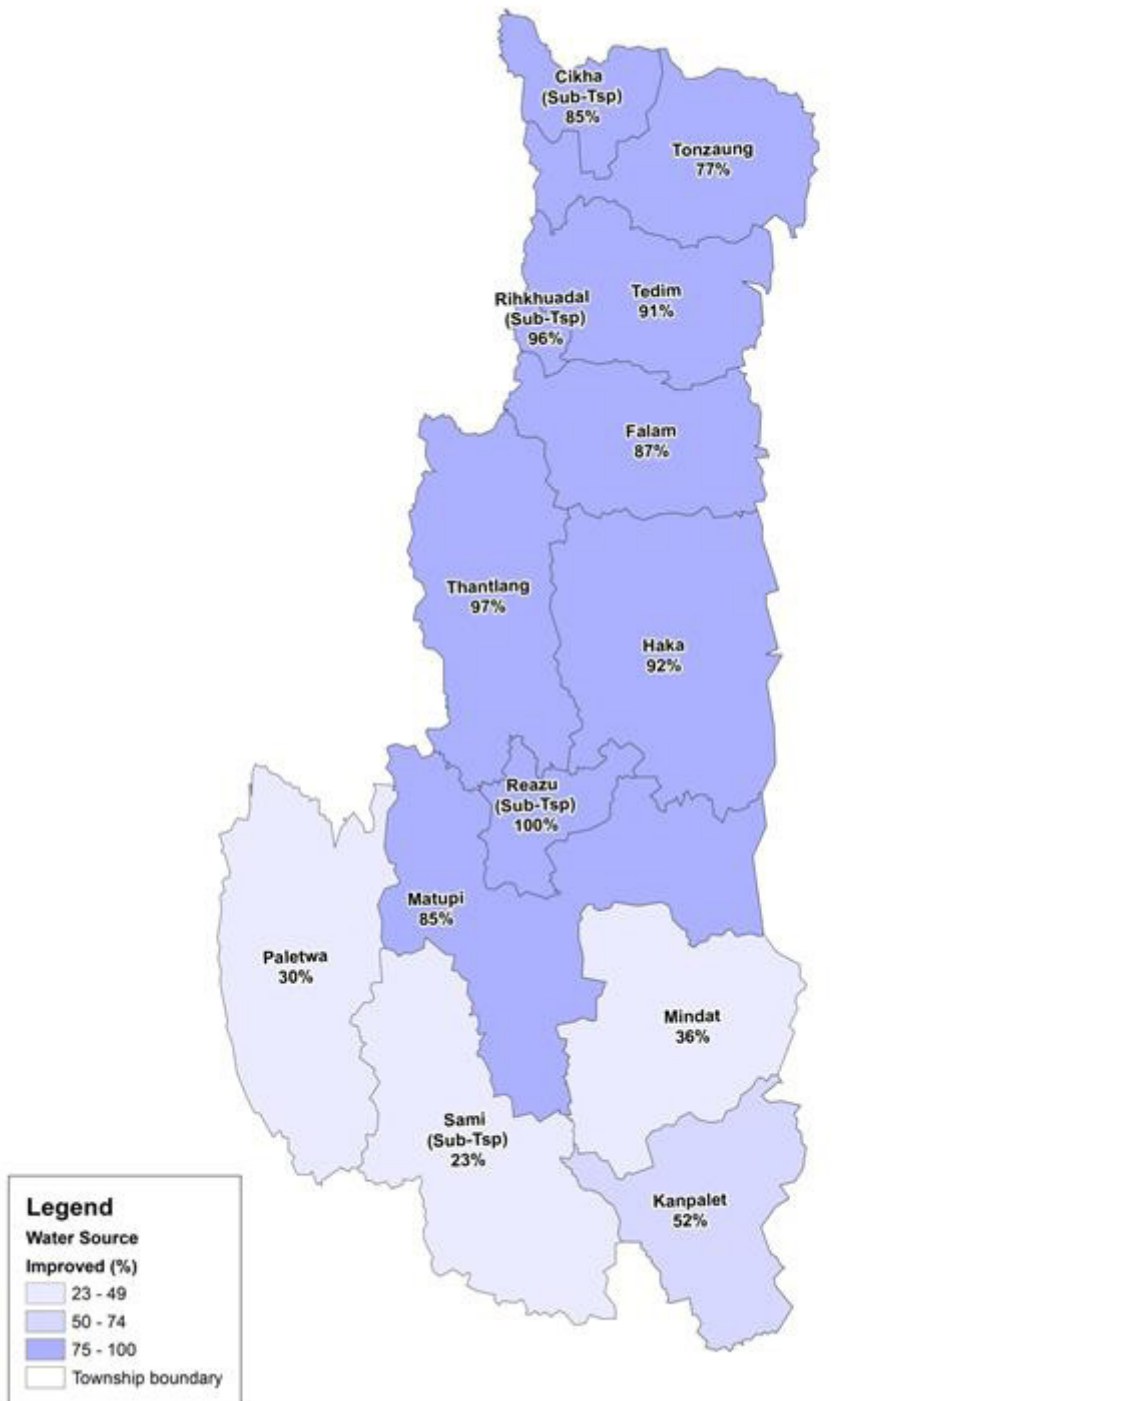

- Some 93.5 per cent of the households in Tedim Township have improved sanitation facilities (flush toilet (0.6%), water seal (improved pit latrine) (92.9%)).
- Compared to other townships in Chin State, Tedim belongs to the highest proportion group of households with improved sanitation facilities.
- The proportion of households with improved sanitation facilities in Chin State is 74.6 per cent while it is 74.3 per cent at the Union level.
- Some 2.0 per cent of the households in the township have no toilet facilities. For the entire Chin State, it is 15.8 per cent.
- In the rural areas of Tedim Township, 2.3 per cent of the households have no toilet facilities.

Note: \* Less than 0.1 per cent.

Source of drinking water

Figure 15: Proportion of households with access to improved source of drinking water

Union	: 69.5%
Chin State	: 70.2%
Falam District	: 88.1%
Tedim Township	: 91.2%

**Table 14: Conventional households by source of drinking water by urban/rural**

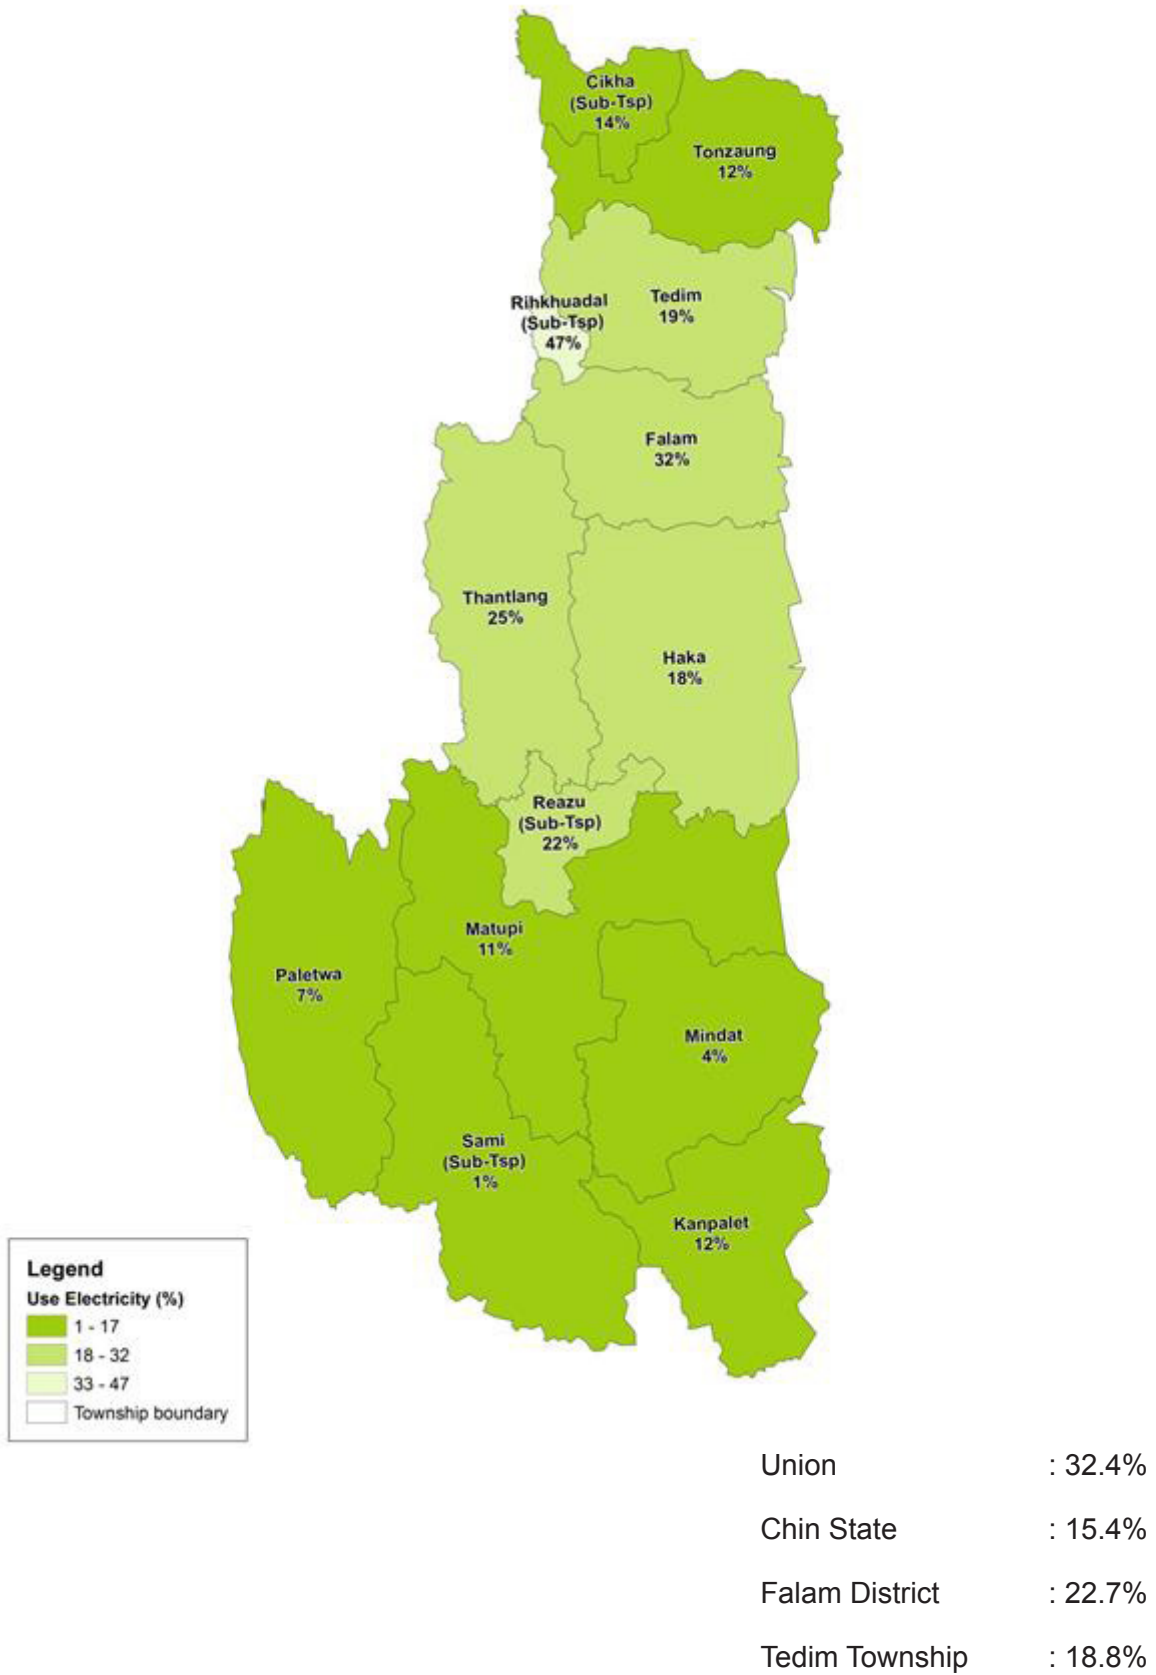

Source of drinking water		Total	Urban	Rural
Tap water/ Piped		90.0	91.0	89.8
Tube well, borehole		0.1	*	0.1
Protected well/ Spring		1.0	0.2	1.1
Bottled water/ Water purifier		0.1	-	0.1
<i>Total improved drinking water</i>		<i>91.2</i>	<i>91.2</i>	<i>91.1</i>
Unprotected well/Spring		2.5	0.5	2.9
Pool/Pond/ Lake		1.4	2.1	1.2
River/stream/ canal		4.4	6.2	4.1
Waterfall/ Rain water		0.1	-	0.2
Other		0.4	-	0.5
<i>Total unimproved drinking water</i>		<i>8.8</i>	<i>8.8</i>	<i>8.9</i>
<b>Total</b>	<b>Per cent</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
	<b>Number</b>	<b>14,683</b>	<b>2,250</b>	<b>12,433</b>

- In Tedim Township, 91.2 per cent of households use improved sources of drinking water (tap water/ piped, tube well, borehole, protected well/spring and bottled water/water purifier).
- Compared to other townships in Chin State, it belongs to the highest group and it is higher than the Union average (69.5%).
- Some 90.0 per cent of the households use water from tap water/piped and 4.4 per cent use water from river/stream/canal.
- Some 8.8 per cent of the households use water from unimproved sources.
- In rural areas, 8.9 per cent of the households use water from unimproved sources for drinking water.

Note: \* Less than 0.1 per cent.

Source of lighting

Figure 16: Proportion of households using electricity for lighting

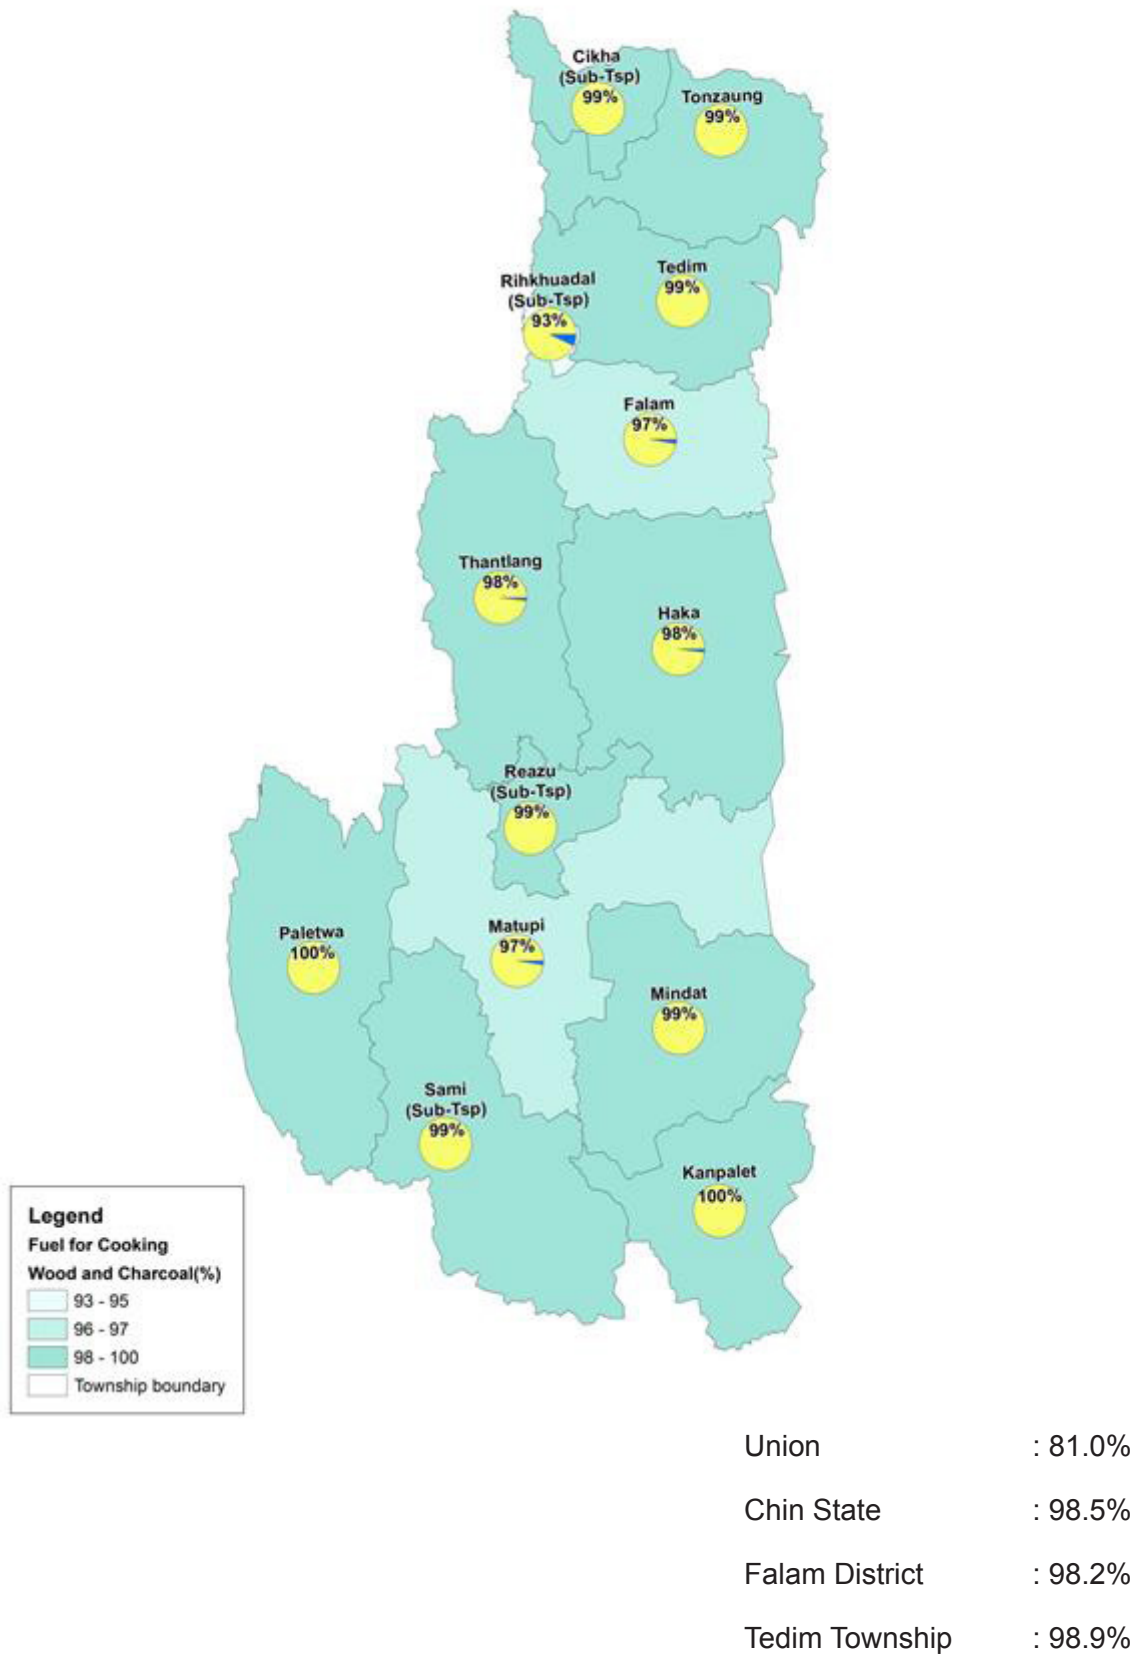

**Table 15: Conventional households by source of lighting by urban/rural**

Source of lighting		Total	Urban	Rural
Electricity		18.8	66.1	10.3
Kerosene		8.3	1.5	9.5
Candle		11.7	24.7	9.4
Battery		8.8	2.0	10.0
Generator (private)		1.9	0.3	2.2
Water mill (private)		26.7	1.7	31.2
Solar system/energy		19.7	3.6	22.6
Other		4.0	0.1	4.7
<b>Total</b>	<b>Per cent</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
	<b>Number</b>	<b>14,683</b>	<b>2,250</b>	<b>12,433</b>

- In Tedim Township, 18.8 per cent of the households use electricity for lighting. This proportion belongs to the (18-32) group in electricity usage compared to other townships in Chin State. The percentage of households that use electricity in Chin State is 15.4 per cent.
- The use of water mill (private) for lighting is the highest in the township with 26.7 per cent.
- In rural areas, 31.2 per cent of the households mainly use water mill (private) for lighting.

Type of cooking fuel

Figure 17: Proportion of households using wood-related cooking fuel

**Table 16: Conventional households by type of cooking fuel by urban/rural**

Type of cooking fuel		Total	Urban	Rural
Electricity		0.6	1.8	0.4
LPG		*	0.1	*
Kerosene		0.1	*	0.1
BioGas		0.1	0.4	0.1
Firewood		95.1	75.6	98.6
Charcoal		3.8	21.1	0.7
Coal		0.3	1.0	0.1
Other		*	*	*
<b>Total</b>	<b>Per cent</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>
	<b>Number</b>	<b>14,683</b>	<b>2,250</b>	<b>12,433</b>

- In Tedim Township, households mainly use wood-related fuels for cooking with 95.1 per cent using firewood and 3.8 per cent using charcoal.
- Only 0.6 per cent of households use electricity for cooking.
- Some 98.6 per cent of households in rural areas use firewood and 0.7 per cent use charcoal.

Note: \* Less than 0.1 per cent.

## Communication and related amenities

**Table 17: Conventional households by availability of communication and related amenities by urban/rural**

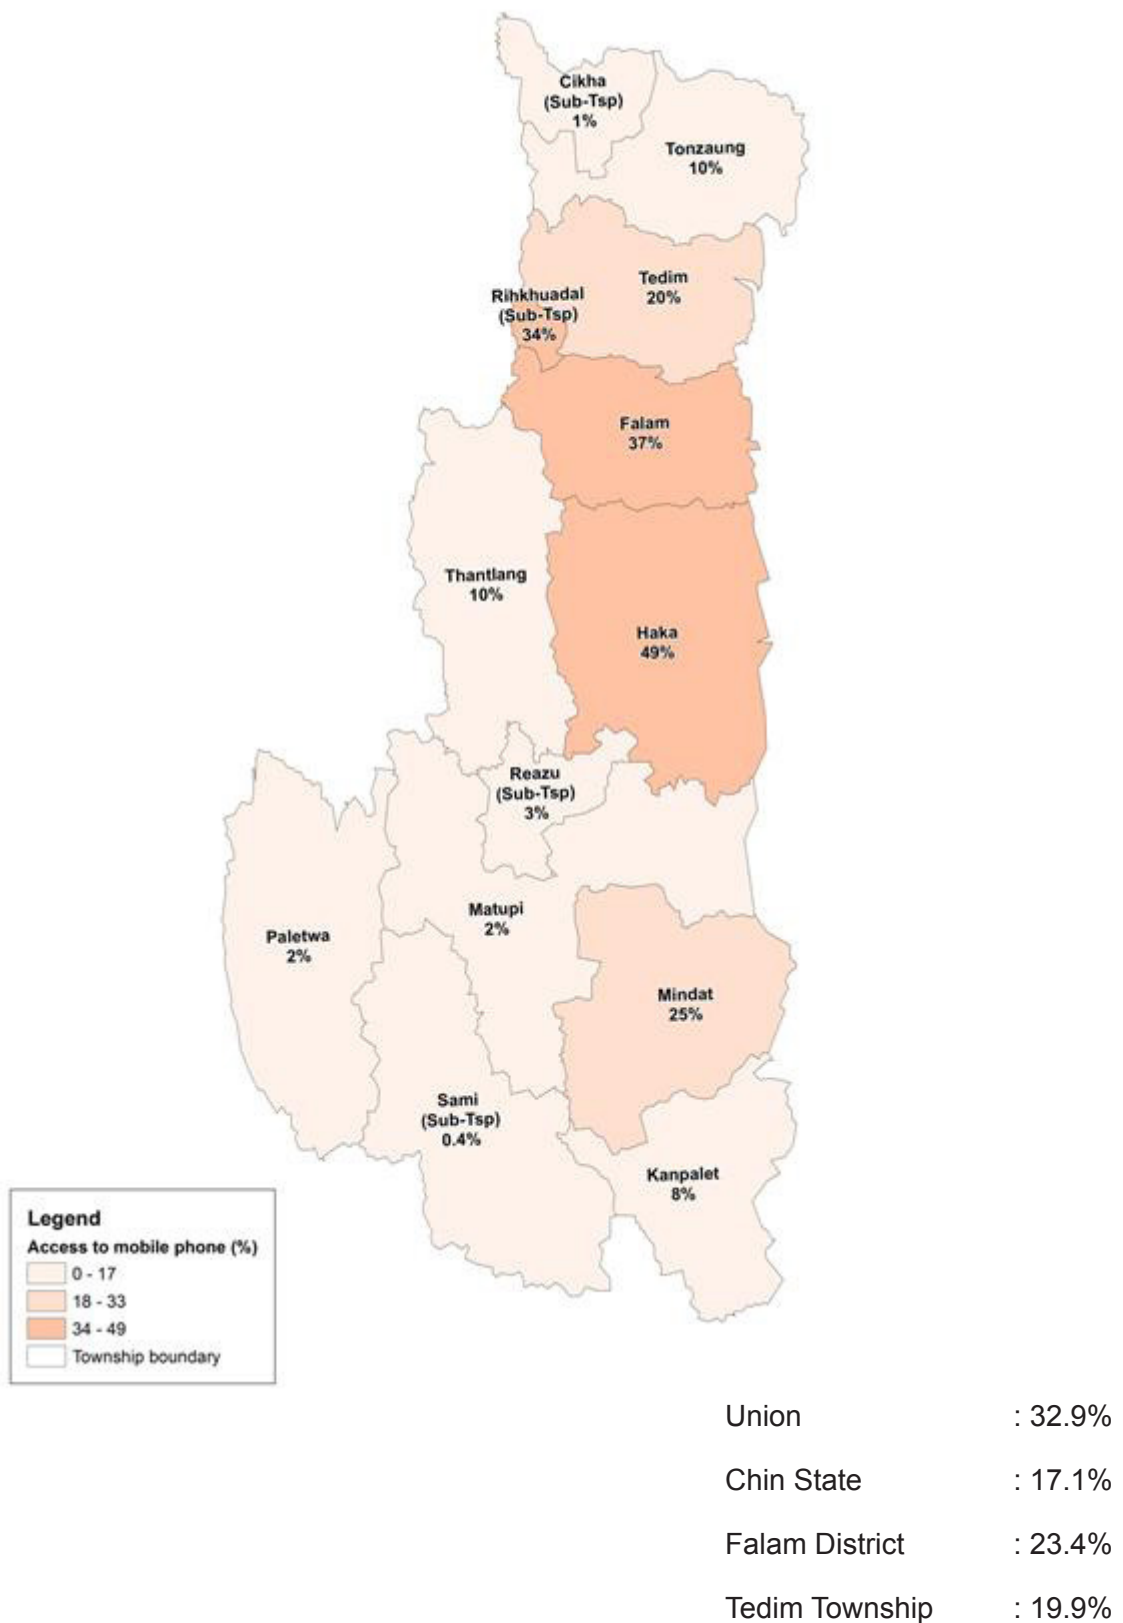

Residence	Conventional households	Radio	Television	Land line phone	Mobile phone	Computer	Internet at home	% with none of the items	% with all of the items
Total	14,683	17.5	30.5	7.5	19.9	3.4	1.9	58.9	0.7
Urban	2,250	24.4	65.7	20.4	52.8	8.5	4.4	23.7	1.5
Rural	12,433	16.2	24.1	5.1	14.0	2.5	1.4	65.3	0.5

- Some 30.5 per cent of the households in Tedim Township have access to television and is the highest among the access of communication and related amenities. Some 65.7 per cent of households in urban areas and 24.1 per cent for rural areas have access to television.

- In Tedim Township, some 30.5 per cent of the households in Township have access to television and about one in six households (17.5%) reported having a radio.

Figure 19: Proportion of households with access to mobile phone

- Only 19.9 per cent of the households in Tedim Township reported having mobile phones. Compared to other townships in Chin State, it belongs to the group (18-33).

## Transportation items

**Table 18: Conventional households by availability of transportation items by urban/rural**

State/District/Township	Conventional households	Car/Truck/ Van	Motorcycle/ Moped	Bicycle	4-Wheel tractor	Canoe/ Boat	Motor boat	Cart (bullock)
Chin State	91,121	733	25,593	3,083	266	611	1,228	7,582
Urban	19,770	444	9,412	1,241	89	83	144	446
Rural	71,351	289	16,181	1,842	177	528	1,084	7,136
Falam District	29,250	328	11,685	2,121	104	41	75	1,297
Urban	5,777	135	3,317	639	28	3	4	38
Rural	23,473	193	8,368	1,482	76	38	71	1,259
Tedim Township	14,683	222	5,306	1,477	74	29	61	783
Urban	2,250	54	1,232	352	12	1	1	28
Rural	12,433	168	4,074	1,125	62	28	60	755

- In Tedim Township, 36.1 per cent of the households have motorcycle/moped as a means of transport and it is the highest proportion, followed by 10.1 per cent of households having bicycle.
- Analysis by urban/rural residence, the majority of the households mainly use motorcycle/ moped as a means of transport.

## (H) Fertility and Mortality

### Fertility

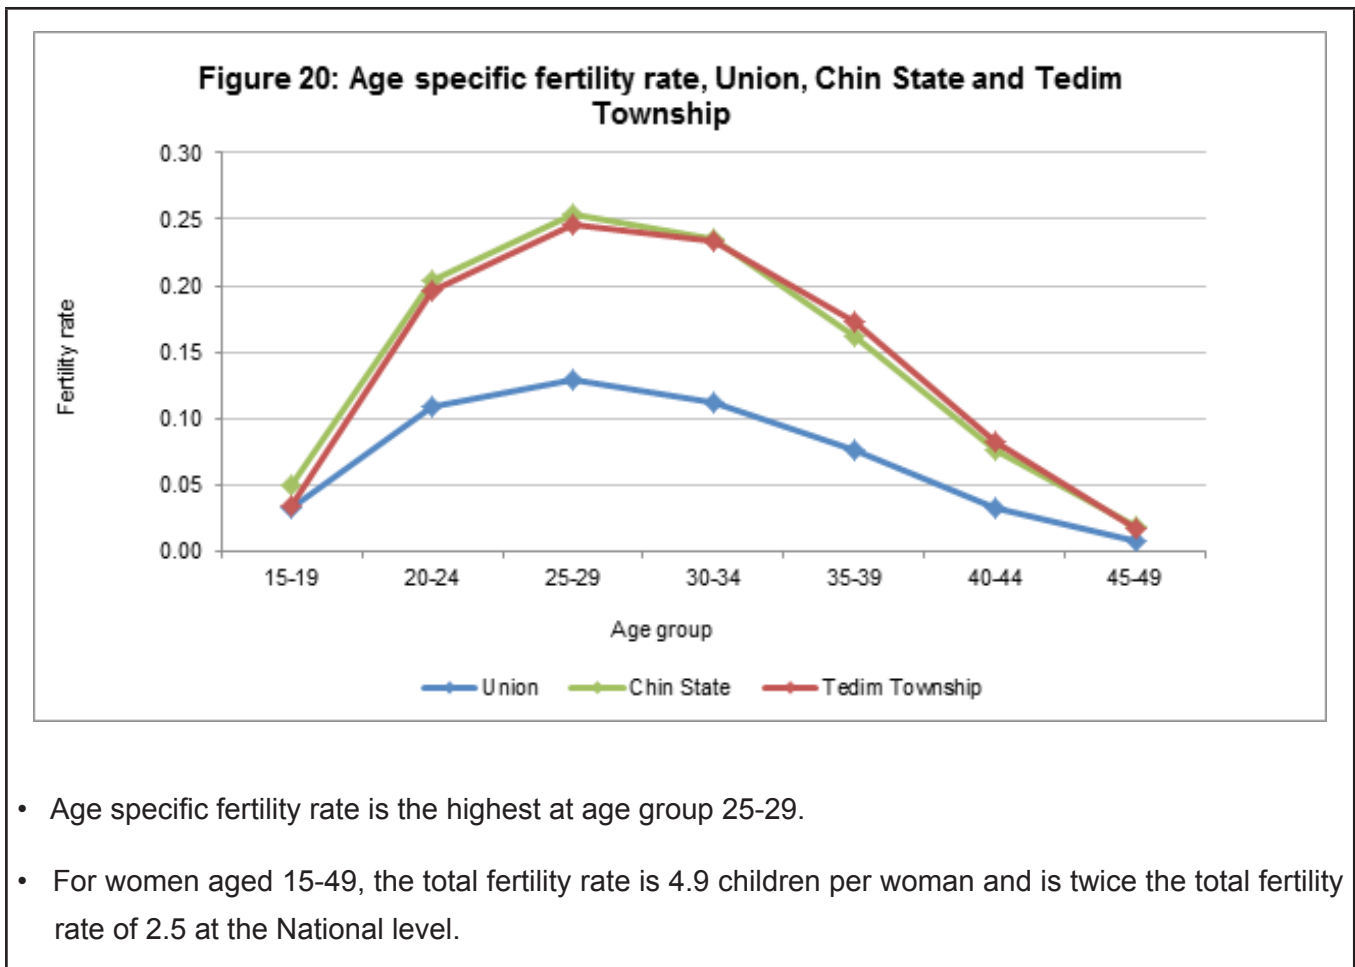

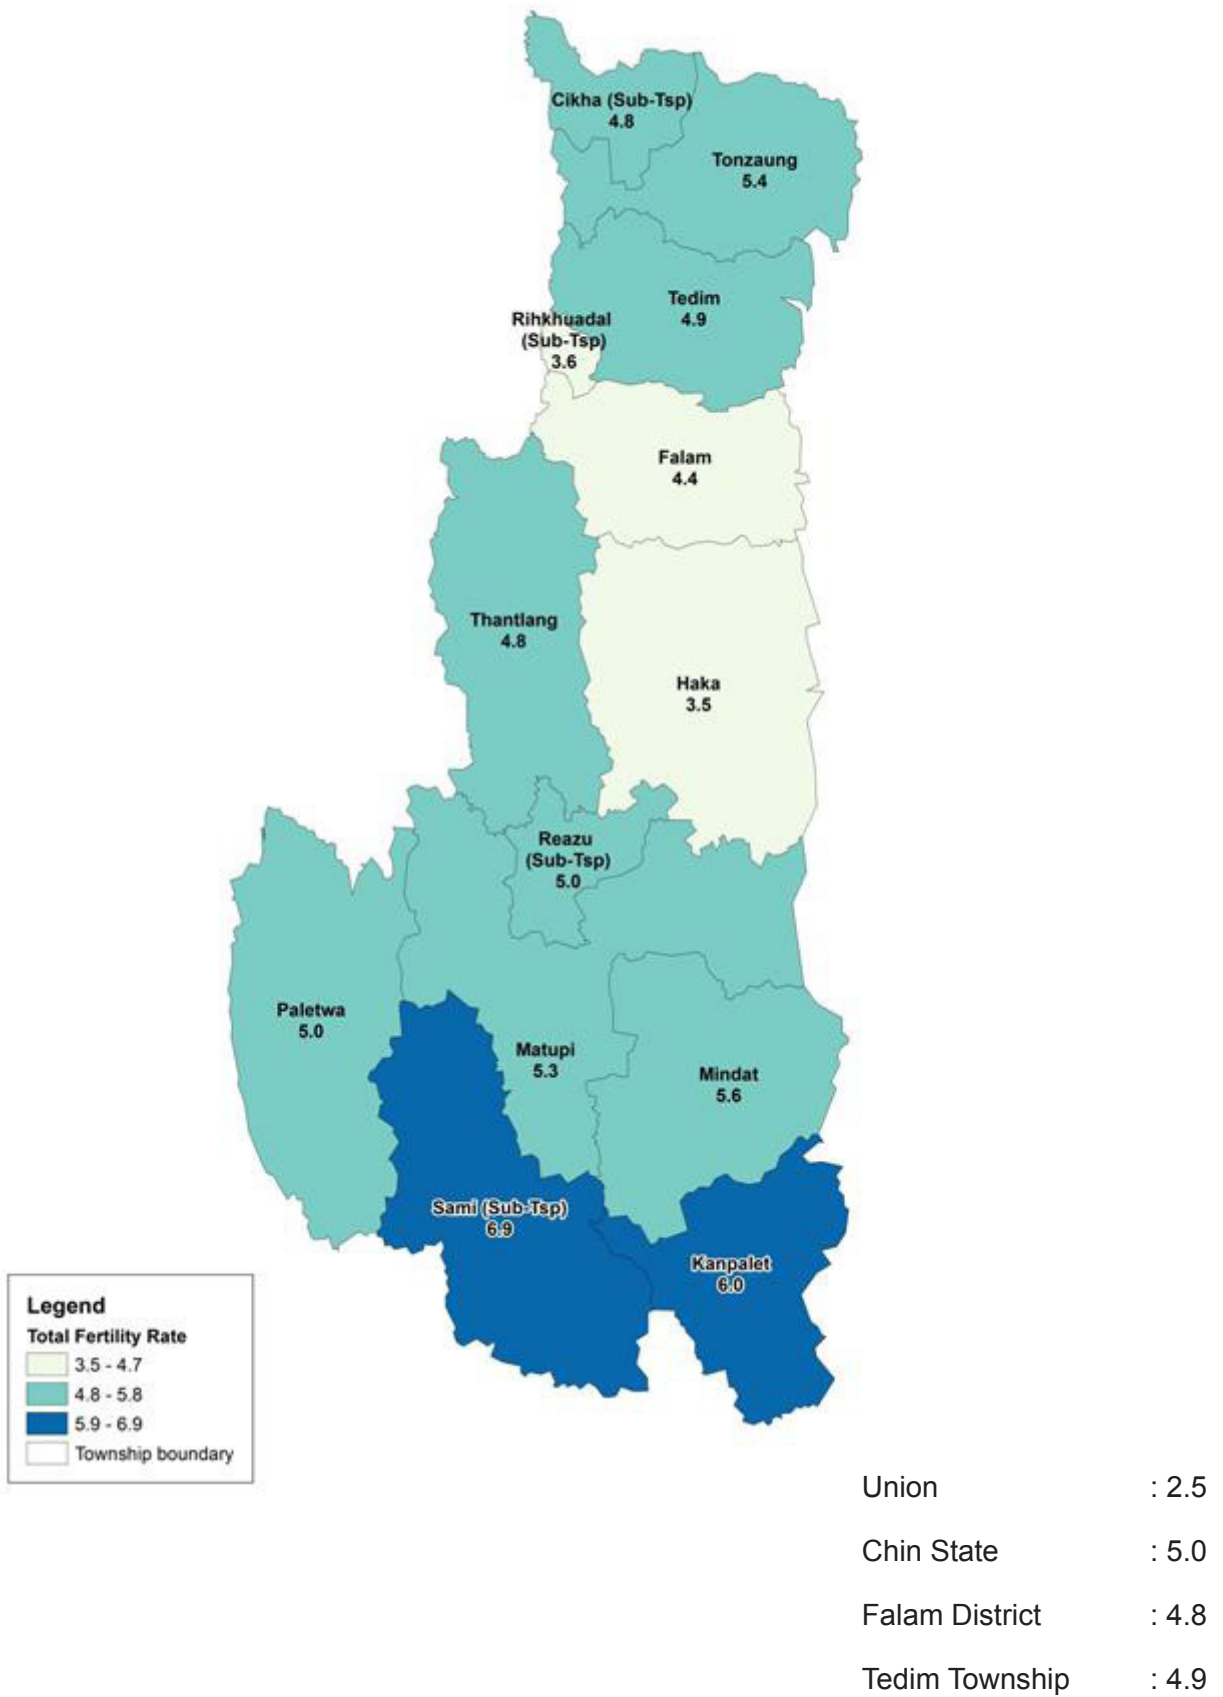

Figure 21: Total fertility rate

**Figure 22: Life expectancy (Union and State/Region)**

- The expectation of life at birth in Chin State is 60.5 years and is lower than that of National level at 64.7 years.
- The female life expectancy at 63.5 years is higher than that of the males at 57.4 years.

### Childhood Mortality and Maternal Mortality

**Figure 23: Infant and Under 5 mortality rates**

- The Infant and Under 5 mortality rates in Falam District are lower than the Union average. The Infant mortality in Falam District is 54 deaths under age one per 1,000 live births while Under 5 mortality is 64 deaths under age 5 per 1,000 live births.
- The Infant and Under 5 mortality rates in Tedim Township are lower than those in Chin State and slightly higher than Falam District. The Infant mortality in Tedim is 58 per 1,000 live births and Under 5 mortality is 68 per 1,000 live births.

**Figure 24: Maternal mortality ratios (Union and State/Region)**

- In Chin State, there are 357 women dying while during pregnancy/delivery or within 42 days of termination of pregnancy for every 100,000 live births.
- The maternal mortality ratio in Chin State is higher than that of the Union level.
- Compared to the average maternal mortality ratio of 140 for Southeast Asian countries, the maternal mortality ratio of 282 for Myanmar is high.

## Definitions and Concepts

**Population:** The population in this report corresponds to the de-facto population of Myanmar on Census Night (see below).

**Census Night:** The night between the 29<sup>th</sup> and the 30<sup>th</sup> March 2014. Every person in Myanmar was enumerated where they spent the Census Night.

**Rural area:** Areas classified by the Department of General Administration (GAD) as village tracts. Generally these are areas with low population density and a land use which is predominantly agricultural.

**Urban area:** Areas classified by the GAD as wards. Generally these areas have an increased density of building structures, population and better infrastructural development.

**Population Density:** The population density relates to the number of persons in a given administrative area to the surface of the area, expressed in square kilometres (Km<sup>2</sup>). Areas covered by water are excluded from the calculation.

**Mean Household Size:** The average number of persons per household (people living in households divided by number of conventional households).

**Sex ratio:** The number of males for every 100 females in a population.

**Dependency ratio:** The total dependency ratio is the ratio of dependents (people younger than 15 years and older than 64) to the population of working-age (age 15-64). Data are shown as the proportion of dependents per 100 working-age population. Three different measures can be calculated: total dependency ratio, child dependency ratio and old age dependency ratio.

**Child Dependency Ratio:** is the proportion of people younger than 15 years to the working age population (15-64).

**Old Dependency Ratio:** is the proportion of people older than 64 years to the working age population (15-64).

**Ageing Index:** The number of persons aged 65 years and over per 100 people under the age of 15 years.

**Median Age:** The age that divides a population into two numerically equal groups; that is, half the people are younger than this age and half are older.

**Education:** Education is the process by which people learn through instruction and teaching. The 2014 MPHC placed an emphasis on literacy skills, school attendance and educational attainment. The other categorisations used under education were:

(a) **Literacy:** The ability to read and write in any language with reasonable understanding.

(b) **School attendance:** The attendance at any regular educational institution or systematic instruction at any level of education during the last 12 months. This included schooling at pre-primary, primary, middle, high school and tertiary institutions of higher learning. The options were: (a) Currently attending; (b) Attended previously; (c) Never attended.

(c) **Educational Attainment:** The highest grade/standard/diploma/degree completed within the most advanced level attended in the education system of the country where the education was received. It covered both public and private institutions accredited by government.

**Disability:** Disability is a situation where a person is at a greater risk than the general population of experiencing restrictions in performing routine activities (including activities of daily living) or participating in roles (such as work) if no supportive measures are offered. The difficulties covered in the 2014 census included:

- (a) **Walking difficulty** (wheel chairs, crutches, limping, problems climbing steps);
- (b) **Seeing difficulty** (low vision, blind);
- (c) **Hearing difficulty** (partially or completely deaf);
- (d) **Mental/Intellectual difficulty** (slow learning development making it hard to compete with their counterparts at school, other mental conditions).

**Identity card:** An identity card is a document used to verify aspects of a person's personal identity. There are several types of identity cards issued by the Government of Myanmar, and national passports in the case of foreigners.

**Labour Force Status:** According to the type of usual economic activities during the 12 months before Census Night, all persons 10 years of age and over were classified as follows:

**Labour Force:** The Labour force is a general term covering “employed” and “unemployed” persons in the population.

**Employed:** “Employed” persons refer to those who did any work during the time of the week before the census date or worked for more than 6 months in the 12 months before the census date for pay or profit, such as a wage, salary, allowance, business profit, etc. Also included in this category were persons

working in family businesses, on a farm, in a store, in a private hospital etc., even though they were not paid any wages.

**Unemployed:** “Unemployed” persons refer to those who had no work but were able to work and actually seeking a job during the reference period, or at the time of the census enumeration.

**Not in labour force:** This category comprised persons who had no work and did not make any positive efforts to find a job during the 6 months before the census date or were unable to work. This included full time students, household work, elderly people, etc.

**Employment Status:** All employed persons were classified according to the economic activity status in the place where they worked during the last 12 months or if they worked in more than one place, where they worked most of the time. There were five employment categories:

- (a) **Employee (Government):** those employed and working for government including in state organisation institutions.
- (b) **Employee (Private organisation):** those employed and working for private employers or private organisations. All people in private companies, NGOs, international organisations, retail and wholesale enterprises fell under this category.
- (c) **Employer:** persons who during the reference period worked in their own business, which also employed one or more other persons.
- (d) **Own account worker:** self-employed persons who worked in their own business or worked in their own/family business for family gain **and did not have any employees.**
- (e) **Unpaid family worker:** persons who worked in a business, farm, trade or professional enterprise operated by a member of the household/family and received no pay.

**Labour force participation rate:** The labour force participation rate is the ratio between the labour force and the overall size of the total population of the same age range. This is an important indicator as it portrays the proportion of the population that is economically active.

$$\text{Labour force participation rate} = \frac{\text{Labour force (Employed + Unemployed)}}{\text{Total Population}} \times 100$$

**Unemployment rate:** The percentage of the total labour force that is unemployed but actively seeking employment and willing to work. These are people who are without work, looking for jobs and available for work.

$$\text{Unemployment rate} = \frac{\text{Unemployed}}{\text{Labour force (Employed + Unemployed)}} \times 100$$

**Employment to population ratio:** A statistical ratio that measures the proportion of the country's working-age population (ages 15 to 64) that is employed. The International Labour Organization (ILO) states that a person is considered employed if they have worked at least 1 hour in "gainful" employment in the most recent week.

$$\text{Employment to population ratio} = \frac{\text{Employed}}{\text{Total Population}} \times 100$$

**Occupation:** Occupation refers to the kind of work an employed person did in the establishment during the 12 months (reference period) before the census date. Put differently, occupation is the kind of work done during the last 12 months by the person employed, regardless of the industry of the establishment. In the 2014 Myanmar Census, field data collectors were instructed to collect a detailed description of the work being done such as accounts clerk, data entry operator (clerk), legal secretary, domestic worker, fisherman, human resource manager, etc. If an employed person was engaged in two or more jobs, the kind of work was decided by the work in which he/she was mainly engaged in, that is in terms of time. The occupational classification is based on the ISCO 2008.

**Industry:** Industry refers to the main activity of the establishment where an employed person usually worked during the 12 months (reference period) before the census date. In the 2014 Myanmar Census, industry was explained to the enumerators as the type of economic activity carried out at the person's place of work. It is defined in terms of the kind of goods produced or services supplied by the enterprise in which the person works and not necessarily the specific duties or functions of the person's job. For example, a clerical officer working in stores within a factory that makes television sets. The industry should be recorded as manufacture of electrical goods. If an employed person worked in two or more establishments, "industry" was decided by the establishment where he/she worked most. The industrial classification is based on the ISIC Revision 4.

**Live Birth:** A live birth is one where the infant shows one or more of the following signs of life immediately after birth: crying or similar sounds, movement of the limbs or any other parts of the body and/or any other tangible signs of life. The census was concerned only with children born alive. Also collected was information on the last live birth of ever married female respondents.

**Total fertility rate (TFR):** The average number of children that a woman would give birth to if all women lived to the end of their childbearing years and bore children according to the current schedule of age-specific fertility rates.

$$\text{Total fertility rate (TFR)} = 5 \sum \text{Age specific fertility rate (ASFR)}$$

**Age specific fertility rate (ASFR):** The age-specific fertility rate measures the annual number of births to women of a specified age or age group per 1,000 women in that age group. Unless otherwise specified, the reference period for the age-specific fertility rates is the calendar year.

## List of Contributors

### Contributors to the Chin State, Falam District, Tedim Township Report

Name	Institution	Role
<b>Prepared by</b>		
Daw Tin Tin Hla	Staff Officer, Department of Population	Leader
Daw Moe Moe Khaing	Assistant Immigration Officer, Department of Population	Assistant
Daw Khine Thinzar Soe	Junior Clerk, Department of Population	Assistant
<b>Translator and Reviewer</b>		
Daw Khin May Than	UNFPA Consultant	Translation and Review
<b>Data Processing and IT Team</b>		
Daw Sandar Myint	Deputy Director, Department of Population	Programming and generation of tables
Daw Su Myat Oo	Immigration Assistant, Department of Population	Generation of tables
Daw Aye Thiri Zaw	Junior Clerk, Department of Population	Generation of tables
Daw Lin Lin Mar	Staff Officer, Department of Population	Generation of maps
U Maung Thet	Junior Clerk, Department of Population	Generation of maps
U Kyaw Lin Aung	Junior Clerk, Department of Population	Generation of maps
<b>Designer</b>		
U Naing Phyo Kyaw	Staff Officer, Department of Population	Graphic Designer
U Sai Maung	Junior Clerk, Department of Population	Graphic Designer
